The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim 16 is objected to because of the following informalities: "region" in the second line should be "region". Appropriate correction is required.

Art Unit: 1636

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-22 and 28 are drawn to a “system”. However, claim 1, for example, then recites “the method comprising:”, and claim 28 depends from a method. However, the term system clearly can refer to a device or apparatus, e.g., “a computer system” or “a home entertainment system”. As such, it is not clear what is encompassed by a system, i.e., a method or a device/apparatus.

Claims 1, 3, 6, 9, 11, 19, 23, 27, 30, 31, 33-35 and 37, and therefore claims 2, 4, 5, 7, 8, 10, 12-18, 20-22, 24-26, 28, 29, 32 and 36 which depend therefrom, recite: “a selected biological insert”; “having a selected cage thickness” and “selected molecule”(claims 1 and 19); “a selected cell culture” (claim 3); “a selected active biological substance” (claims 6, 11, 19 and 23); “a selected bead” (claim 9); “a selected ambient medium”, “a selected chemical”, “a selected active substance” and “a selected cage thickness” (claim 27); “a selected biological insert”, “a selected cage thickness”, and “a selected triggering agent” (claim 30); “a second selected time” and “a second selected triggering agent” (claim 31); “a selected medical device”, “a selected cage thickness”, “selected molecule”, “selected molecules”, “a selected activation time” and “a selected inactivation time” (claim 33); “a selected chemical” and “a selected signal” (claims 34 and 35); and “a selected control time” (claim 37). However, the term “selected” does not convey any clear limitation of the term it modifies. As such, it is not clear in each

Art Unit: 1636

instance whether the “selected” quality or quantity is selected from a particular subset of all possibilities, or if any quality or quantity is encompassed. For example, how does “a selected cage thickness” differ from “a cage thickness”? As such, the term “selected” in these instances provides no meaning or limitation to the claims.

Claim 21 recites “insulin-containing compound”. However, insulin is a compound, and would not be “contained” in another compound.

Claim 28 is grammatically structured as “comprising estimating a degree...and interprets this degree”. However, this represents a confusing grammatical shift of the verb form, i.e., non-parallel construction. Furthermore, it makes unclear what the subject of “interprets” is.
